

ECS::GetComponent

```
graph LR; A[ECS::GetComponent] --> B[StorageComponent::get]; B --> C[StorageComponent::has];
```

The diagram illustrates a sequence of three function calls. The first call, 'ECS::GetComponent', is highlighted with a grey background. It points via a blue arrow to the second call, 'StorageComponent::get', which has a white background. This second call then points via another blue arrow to the third call, 'StorageComponent::has', also with a white background. All three calls are contained within rectangular boxes with dark borders.

StorageComponent::get

StorageComponent::has
